MODULAR KITCHEN

15

POISE in its literal sense means - dignified, defined, graceful and controlled.

Chindhy's Interior's with design & manufacturing expertise of 30 years introduces the brand 'Poise' to India with the same values and objectives the name implies. At Poise the kitchens are designed by creative designers with a dedicated Customer centric approach and are trained to provide personalized solutions based using Ergonomic principles.

The Kitchens are manufactured using imported CNC machinery, by competent engineers, who ensure precision and are regimented by stringent quality control measures, to enable our product to withstand the heavy Indian usage.

SKIRTING

POISE is constantly evolving and innovating to give your home the perfect make-over. We strive to achieve this by providing products and services that assist you in your day-to-day chores and maximize your comfort. One of our offerings is the Skirting option in modular kitchens- ensuring high-quality and convenience and the assurance of a hassle free and beautiful kitchen experience.

1. Easy installation
2. Use of high quality, light, difficult to deform, anti-aging, hump-resistant material
3. Improves the look of your wall or flooring

HINGES

Soft closing hinges help in easy opening and closing of cabinet shutters, simplifying cooking experience by furthering comfort. They are made with Soft Close mechanism which facilitates smooth closing of doors. With Soft door hinges there is no slamming of the door, which leads to longevity and easy maintenance of your kitchen. Some other features are:

1. The overload safety feature safeguards the hinge from damage if the door is slammed.
2. The deactivation switch enables small or light doors to close with the same high quality of motion.
3. Easily interchangeable with current compact hinge

FULLEXTENSION MECHANISM

The Full Extension Mechanism comprises of various slides which can be used in drawers, file cabinets, kitchen baskets, etc. Its functionality is to ensure easy and smooth sliding. This mechanism gives the convenience of "holding the drawer in its slot", which holds drawer in place and ensures it doesn't fall out of its slot even if it is fully drawn out.

1. Ball bearings help in reduction of friction
2. Holds the drawer in its slot and does not allow it to fall out
3. Gives higher load bearing capacity
4. Available in soft close, auto close and self-close options

SOFT CLOSING MECHANISM

Soft close is a mechanism which reduces the speed of a door or a drawer as it closes on its own. The door or drawer is pushed back normally, the moment it reaches the last 25 degrees of closure, the soft close mechanism will act and the door or drawer will slow down immediately and then close gradually and silently.

1. Easy height side tilt adjustment
2. Matching organization options
3. Can be upgraded with touch to open features

ACCESSORIES

Accessories add more features to a kitchen's functionality. For a perfect kitchen experience, more accessories coupled with specialized hardware can be added to bring out the most advanced and exceptional results. We, at Evok, provide a wide range of accessories that can be used with various models to make your kitchen a wonderful place. The products are long lasting with the finest quality of craftsmanship.
